

Scholarships for HCMUT/HCMIU students

Do you want to have a semester in Norway taking courses or doing your master project within Micro and Nano Systems Technology or Embedded Systems? University College of Southeast Norway can offer two exchange scholarships for HCMUT/HCMIU students for the autumn semester 2017.

University College of Southeast Norway (HSN) is a multi-campus institution offering master programmes in [Micro and Nano Systems Technology](#) and [Embedded Systems](#). Students from HCMUT and HCMIU are welcome to apply for an exchange period autumn semester 2017 at one of these programmes. There may be a possibility for expanding the period to include spring semester 2018 for qualified students. More information about the programmes can be found if you check out the links above. When applying, the student should indicate the courses he or she wants to follow. Be aware that only courses from one programme can be selected as they are offered at different campuses. If interested in doing your master project at HSN please indicate that in your application.

General Requirements

Applicants must

- be enrolled as a master student in Electronics and Telecommunication graduate programs at either Ho Chi Minh City University of Technology (HCMUT), Faculty of Electrical & Electronic Engineering or International University, Ho Chi Minh City (HCMIU), School of Electrical Engineering. **NOTE that applications from other institutions or departments/schools will not be accepted.**
- have a cumulative grade point average in the BSc grade equivalent to, or better than, a C in the ECTS system.
- be able to provide proof of English proficiency. May be forwarded later, within 24 April 2017. HSN accept IELTS with a minimum overall score of 6.0 (Academic test) or TOFEL with a minimum score of 550 (paper based), 213 (computer based) or 80 (internet based).

Academic Requirements

- **Micro and Nano Systems Technology:** BSc in Engineering in micro/nano systems technology, electrical/electronic engineering, mechanical engineering, chemical engineering, bioengineering, physics or materials science. In the bachelor degree, the student should have completed at least 25 ETCS in mathematics, a course in electrostatics/electromagnetism and a basic course in analogue electronics.
- **Embedded Systems:** BSc in Engineering within either Computer Science or Electrical Engineering. Knowledge of object-oriented programming is an advantage.

Application Deadlines and Application Form

The application deadline is **16 April 2017**. Kindly include the following documents in your application:

- Application Form
- Your transcripts from HCMUT or HCMIU
- Letter of Motivation
- English proficiency test (may be forwarded later, within 24 April 2017)

All documents must be translated to English. Send the application to kristin.imenes@usn.no as one single merged pdf-file.

Interview

Qualified applicants will be called for interviews in the last half of April, 2017.

What Does the Scholarship Cover?

Selected students will be granted an amount not exceeding NOK 62 500 for the exchange to the University of Southeast Norway (HSN) for the autumn semester 2017. The exchange is part of NORPART partnership program between HSN and HCMUT/HCMIU. The award will cover travelling expenses, insurance, visa cost, housing and living expenses in the duration of the student exchange.
