

- We are EyeQ Tech (www.eyeq.tech), the most notable computer-vision startup in Vietnam (won Startup Wheel Championship, and Rice Bowl award for best e-commerce startup).
- We are on the mission to inject intelligence into what doesn't have it, from retail, advertising, banking to healthcare, robotics. Our clients include Vin group, The Coffee House and 1 bank (NDA-ed)
- What we do exactly? We build a face recognition system. Imagine you walk into the bank, you don't have to pull out ID card, but the staff still recognizes who you are and welcome you, then give everything you need to sign the moment you sit down, no time wasted.

Robotics Engineers at EyeQ deals with real world problems. They must engage on practical situation in order to experiment and analyze the underlying model and requirements of customers. Then, they cooperate with Computer Vision team to develop robust autonomous system (i.e. mobile rover, robotics arm, etc.) to meet the requirements of customers with certain reliability and durability.

ROBOTIC AUTOMATION & CONTROLS ENGINEERS

Requirements:

- CAD (EAGLE CAD/Orcad/kidcad ...) for Electronics Circuit Design.
- C/C++, Python.
- Matlab, "Proteus"
- 3D mechanical model with Solid work or Inventor (Preferred)
- Be diligent, have a high sense of responsibility

Overall Requirements:

- ✓ Skills of problem solving and fast learning

✓ Intermediate skills reading/ writing documents in English

Benefits:

- Base Salary: Junior: up to 500\$ for full-time position, Senior: Up to 1,000\$ for full-time position:
